

Toyota Forklift Parts

Toyota Forklift Parts - In the U.S., Toyota Materials Handling inc., or TMHU, has been the top selling lift truck supplier since 1992. Proudly celebrating more than 40 years of operations, the Irvine, California situated company offers a wide-ranging line of quality lift vehicles. Attributable to their history of excellence, reliability, and resilience, Toyota remains prevalent in this aggressive market. Quality is the cornerstone of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S. are manufactured here.

Every one of Toyota's manufacturing facilities within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its commitment to continual improvement, and its environmental methods. It is the first and only producer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For instance, the Toyota 8-Series IC lift trucks emit 70 percent less smog forming emissions than the existing centralized EPA standards and have complied with California's strict emission standards and policies.

Toyota Material Handling, U.S.A. - The Industry Leader

The head of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's achievement comes from its commitment to produce high quality lift vehicles at the same time as offering excellent customer support and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues."• TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's largest lift truck dealer and is among the magazines impressive World's Most Admired Companies.

Redefining Environmental Responsibility

Toyota Industries Corporation, as the parent company, has instilled a rich corporate doctrine of environmental stewardship in Toyota. Not many other companies and no other lift truck manufacturer can meet Toyota's record of caring for the environment while simultaneously encouraging the economy. Environmental accountability is a key aspect of company decision making at Toyota and they are proud to be the first and only producer to provide UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet one more reason they remain a leader within the industry.

In 2006, Toyota introduced the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission principles, and also meets California's more elaborate 2010 emission standards. The finished invention is a lift truck that produces 70% less smog forming emissions than the existing Federal standards tolerate.

Furthermore in 2006, Toyota developed an affiliation with the Arbor Day Foundation, furthering their responsibility to the environment. More than 57,000 trees have been planted in district parks and national forests damaged by ecological causes such as fires, as a result of this partnership. 10,500 seedlings have also been circulated through Toyota Industrial Equipment's system of dealers to non-profit organizations and neighborhood customers to help sustain communities all over the United States

Toyota's lift trucks offer improved stability, visibility, efficiency, ergonomics, and all the foremost safety technology that has made Toyota an industry leader. The company's System of Active Stability, also called "SAS"•, helps limit the chance of incidents and injuries, in addition to increasing productivity levels while minimizing the potential for merchandise and equipment breakage.

System Active Stability senses many conditions that could lead to lateral volatility and potential lateral overturn. When one of those conditions are detected, SAS instantaneously engages the Swing Lock Cylinder to steady the rear axle. This alters the lift truck's stability footprint from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the probability of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also helps to prevent injuries or accidents while adding stability.

SAS was first launched to the market on the 7-Series internal combustion models in 1999 and subsequently catapulted Toyota into the industry leader for safety. Ever since then, SAS has been integrated into nearly all of Toyota's internal combustion products. It is standard gear on the latest 8-Series. There are more than 100,000 SAS-equipped lift trucks in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with obligatory operator training, overturn fatalities across all designs have decreased by 13.6% since 1999. Also, there have been an overall 35.5% decrease in industry wide collisions, loss of control, falls and tip overs from a lift vehicle for the same period.

Toyota's hardnosed standards continue far beyond the machinery itself. The company believes in offering extensive Operator Safety Training services to help users meet and exceed OSHA standard 1910.178. Training courses, video tutorials and assorted materials, covering a wide scope of topics-from individual safety, to OSHA regulations, to surface and load conditions, are offered through the supplier network.

Ever since the transaction of its first lift truck in the U.S. to the fabrication of its 350,000th lift truck produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has continued a unbroken existence in the U.S. This fact is demonstrated by the statistic that 99% of Toyota lift trucks bought in America today are manufactured in the United States.

TMHU is based in Columbus Indiana and houses nearly 1 million square feet of production facilities over 126 acres of land. Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service

components, with the whole commitment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both sellers and consumers of TMHU. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an section for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its creator, Sakichi Toyoda, in 1867, and finally a instruction center.

TMHU has 68 authorized industrial equipment dealers, along with 189 dealership locations throughout the United States, offering the most complete and inclusive client support and customer service in the industry. The company's new and Licensed Used lift trucks, service, parts, and financing capabilities make Toyota dealerships a one-stop shop to ensure overall customer satisfaction.
