Doosan Infracore America is the fastest expanding lift truck business in the North American market, due to their consistency in retaining a high degree of consumer service excellence and optimum product functioning to all Doosan Infracore Forklift users. The U.S. lift Truck division situated in Cleveland has a expert team knowledgeable in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Originally the domestic lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled lift trucks as part of a domestic equipment expansion project. Product sales of these goods were originally targeted to state-run companies, large scale corporations, and the military. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical education grew to become the new focus for improving quality and product development.

Daewoo started the first domestic lift truck business in 1967, and quickly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's advanced technological advancements combined with sales success placed them in a situation of considerable expansion of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to assist them in the very competitive North American materials handling market. This joint-venture proved highly successful for Daewoo and their forklift sales expanded greatly. In 1984, the company completed construction of a new facility to help in manufacturing high end value-added products for export. In 1993, the company had a global sales network and started exporting designs they had established through in-house expertise, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas marketplaces.
